

MERN STACK

Anuj Dhungana

A dedicated and results-oriented Bachelor of Information Management (BIM) graduate with a strong foundation in information management principles and IT. I have a solid understanding of JavaScript and the MERN stack. My practical problem-solving skills and hands-on experience in developing web applications enable me to tackle complex challenges effectively.

I am currently seeking an internship position to leverage my education and development skills to contribute to dynamic projects. My goal is to enhance my technical abilities and gain valuable industry experience by working on innovative and impactful solutions.
